INTRODUCTION

A team with new perspectives

We're a multidisciplinary team offering full engineering, architectural, quantity surveying, project management and total installation solutions.

A helping hand goes a long way

MOKHADA GROUP is committed to the improvement, not only of the people who directly contribute to the company's success but also to the progress and development of the construction industry.

OUR STORY

MOKHADA GROUP, established in 2015, is a multidisciplinary Level 1 BBBEE compliant firm of built-environment consultants based in Sunnyside, Pretoria.

We provide professional consulting services in Civil, Structural, Water, Electrical and Geotechnical Engineering as well as Architecture, Quantity Surveying and Project Management services.

Our enthusiastic team, with a combined 50 years' of experience, has a proven track record of successfully completing small to large projects both nationally and internationally, efficiently and with absolute integrity, expertise and experience.

We are"AEIOU" Driven

- Accuracy
- Efficiency

- Usability

OUR SERVICES

MOKHADA GROUP (PTY) LTD

As a professional multidisciplinary team we strive to share our passion, knowledge and expertise with clients who require exceptional service.

Engineering

We provide a wide range of engineering services including: Civil, Structural, Water, Electrical, and Mechanical Engineering services. We also offer clients financial engineering services to ensure design, project and value optimization.

Architecture

Our bespoke designs to client needs integrate sustainable and green solutions for residential, commercial, industrial, medical and institutional buildings.

Project Management

We offer comprehensive project management services throughout the project lifecycle including tenant coordination, development assistance, watching briefs and more.

Dispute Resolution

We offer expert witnesses to clients in their Alternative Dispute Resolution (ADR) methods. Our technical knowledge allows us to assist clients in their conciliation, arbitration, mediation and expert selection processes.

Quantity Surveying

We offer a full range of quantity surveying services from initial cost estimates to final accounts. We ensure the highest level of quantity surveying, specialised and supplementary services to the construction and property development industry which includes maximising returns for our clients.

Installation Solutions

Our wide range of expert multidisciplinary consulting services ensure clients enjoy a single point of entry for their project. We offer clients total installation solutions when it comes to their professional team resulting in the optimal time and cost advantage throughout the construction of the project and beyond.

COMMUNITY

We have a social responsibility

Creating leaders for tomorrow.

We provide bursaries to deserving candidates for studies at tertiary institutions and we are committed to the development of previously-disadvantaged and disabled individuals. Our contributions to our leaders of tomorrow include sponsorship of sports tournaments, tours and equipment for learners and communities.

We said yes!

We're working with Youth Employment Services or YES to create work opportunities for black South African youth at scale and together, building a future that works.

This platform transforms the work seeking experience of young South Africans from being complicated and costly to one which is accessible and less expensive.

Training and Skills Development.

MOKHADA GROUP is committed to skills transfer and the improvement of not only the people who contribute to the company's success, but also the progress and development of the construction industry at large.

We promote and encourage training and the development of our personnel through our in-house staff development sessions and external training programmes.

We offer bursaries to deserving Civil and Architecture students annually. Our engineers and architects continuously assist with the development of emerging enterprises and contractors.

It is important that previously-disadvantaged individuals and business enterprises are assisted and able to develop and obtain the necessary experience in order to achieve their full potential. This encourages young individuals to enter the industry and contributes to the growth and prosperity of our country.

OUR PROJECTS

MOKHADA GROUP

Throughout the years we have time and again proved our excellent work ethic while delivering world class projects ranging from large scale commercial projects to specialised buildings.

New Distribution Centre Warehouse

MOKHADA GROUP assisted the client in the development of this property to extract maximum value from the land. The topography necessitated that large box cuts needed to be made. Conventional concrete retaining walls were too expensive and detrimental to the feasibility of this particular project. This obstacle was overcome by installing a gunnite wall with soil nails.
